

SUPERFUND BLUE SPC CLASS A (USD) ENDED THE MONTH OF DECEMBER WITH A PERFORMANCE OF -7.14 %

Superfund Blue employs a systematic equity market neutral strategy which aims to produce consistent returns regardless of wider market conditions with relatively low volatility. The fund can achieve capital gains by short term trading on the performance of stocks that are expected to outperform the overall market. A market neutral portfolio is created by hedging leveraged equity positions with index futures. The fully systematic Superfund Blue trading strategy trades on the performance of equities listed on major stock exchanges primarily in Europe, Asia and America. It is intended to have minimal or even no correlation to other asset classes, and therefore has the potential to be an effective diversifier for most portfolios.
