Superfund Green predominantly employs medium- to long-term trend following strategies and trades in approximately 150 liquid financial and commodity markets around the world. For further diversification, Superfund Green also utilizes short-term strategies, such as forecast models, counter trend, and short-term trend following. This managed futures strategy aims to achieve high returns in both falling and rising markets and a target volatility of about 25% p.a. The Superfund Green managed futures strategy has been utilized successfully in the long term since March 1996 and is based on proprietary, fully automated trading systems, which effectively eliminate human emotion. Overall risk is permanently screened and each trading position is continuously adjusted according to market volatility. Due to its low correlation to other asset classes in the long term, Superfund Green can be a valuable addition to every portfolio.

### Superfund Green SPC A USD ENDED THE MONTH OF MARCH WITH A PERFORMANCE OF 1.77 %

Superfund Green predominantly employs medium- to long-term trend following strategies and trades in approximately 150 liquid financial and commodity markets around the world. For further diversification, Superfund Green also utilizes short-term strategies, such as forecast models, counter trend, and short-term trend following. This managed futures strategy aims to achieve high returns in both falling and rising markets and a target volatility of about 25% p.a. The Superfund Green managed futures strategy has been utilized successfully in the long term since March 1996 and is based on proprietary, fully automated trading systems, which effectively eliminate human emotion. Overall risk is permanently screened and each trading position is continuously adjusted according to market volatility. Due to its low correlation to other asset classes in the long term, Superfund Green can be a valuable addition to every portfolio.
