

## SUPERFUND RED GOLD SICAV ENDED THE MONTH OF NOVEMBER WITH A PERFORMANCE OF 2.03 %

Superfund Red<sup>A)</sup> is a short-term managed futures strategy that aims to generate profits in any market environment - independent of medium to long-term trends, and regardless of whether markets are rising or falling.<sup>B)</sup> The Superfund Red strategy has been tested over the past several years with real money - that of Superfund founder Christian Baha - and continuously improved over this time. The Superfund Red strategy has also been carefully backtested against 14 years of historical market data. The Superfund Red strategy trades in some 60 different futures and foreign exchange markets around the globe. These markets are very liquid and include not only currencies, bonds and equity indices but also various commodities, such as energy and metals. Trading this great variety of markets, opportunities for short-term trading profits are constantly to be found since the markets move quite independently of each other.<sup>B)</sup> The Superfund Red trading strategy is based upon many different individual short-term trading systems - tested in the markets over many years in live, realtime operation - which are combined into a robust, overall "system of systems". The individual trading systems are put into action selectively, depending on prevailing market opportunities, and enabling profits to be generated from short-term trading positions, independent of any medium- to long-term trends.

A) This marketing information constitutes neither an offer to sell nor a solicitation to invest. Such an offer or solicitation will be made only in those jurisdictions where permitted by law and will be preceded or accompanied by a current prospectus and such other offering documents as may be required. This information has been prepared without taking into account anyone's objectives, financial situation or needs so before acting on it consider its appropriateness to your circumstances. B) Important Notice to Superfund Red Strategy: **Past performance is not a reliable indicator of future results.** There is a substantial risk of loss in trading futures and opinions. Drawdowns may occur due to market conditions and may range approximately from 30% to 50% from the respective all-time-high. Decreases in value exceeding these figures are also possible at anytime, and the **possibility of a complete loss** of the principal invested cannot be excluded. Superfund Red USD, Superfund Red Gold and Superfund Red Silver are traded in USD. Fluctuations in the USD/EUR exchange rate may substantially decrease the net asset value.
