

MEDIUM- TO LONG-TERM MANAGED-FUTURES STRATEGY

Superfund Green predominantly employs medium- to long-term trend following strategies and trades in approximately 150 liquid financial and commodity markets around the world. For further diversification, Superfund Green also utilizes short-term strategies, such as forecast models, counter trend, and short-term trend following. This managed futures strategy aims to achieve high returns in both falling and rising markets. The Superfund Green managed futures strategy has been utilized successfully in the long term since March 1996 and is based on proprietary, fully automated trading systems, which effectively eliminate human emotion. Overall risk is permanently screened and each trading position is continuously adjusted according to market volatility. Due to its low correlation to other asset classes in the long term, Superfund Green can be a valuable addition to every portfolio.

Important notice: The performance illustrated is based upon net values after deduction of fees (but excluding sales surcharges or deduction of any taxes). **Past performance is not indicative of future results.** The inclusion of initial sales surcharges, which may be up to 7%, will reduce net returns accordingly. Funds which are traded in USD may have substantial increases or decreases of the net asset value due to fluctuations in the USD/EUR exchange rate. Please also read the disclaimer at the last page. Superfund Green Q-AG is the flagship Superfund fund employing the traditional strategy. Results for other Superfund funds employing the same strategy will be different due to multiple factors, including but not limited to, different fee structures, different levels of assets under management, and the possibility of different entry and exit points. Superfund funds employing the dynamic and aggressive strategies may realize significantly different results due to their increased leverage as well as the factors described above.

3) The reported margin-to-equity ratio (MER) for Superfund Green Q-AG represents the average MER for the reported month. Reported margin requirements are based on both exchange and clearing broker requirements. Clearing broker requirements may be materially higher than exchange requirements, and both may fluctuate from time to time over time. The MER can change rapidly due to market conditions and thus the reported MER should not be considered an overall average or target MER.

Sector results

Sectors	Allocation	Result	Performance attribution
Stock Indices	21 %	2.14 %	
Bonds	9 %	0.89 %	
Money Markets	16 %	-0.23 %	
Currencies	23 %	-1.26 %	
Grains	7 %	0.58 %	
Energies	6 %	-0.47 %	
Metals	7 %	-0.54 %	
Agricultural Markets	11 %	-3.36 %	
Total	100 %	-2.25 %	

All figures above refer to Superfund Green Q-AG (closed fund).

The sector allocation chart represents the estimated margin required of Superfund Green Q-AG to maintain its open futures and forward market positions as of the date reported. It is to be used as an indication only. Margin requirements may change rapidly due to market conditions. Additionally, the allocations of other Superfund funds employing the same strategy as Superfund Green Q-AG may differ due to multiple factors, including but not limited to different levels of assets under management, the possibility of different entry and exit points, and local regulations which may limit the markets traded.

Important notice:

Past performance is not indicative of future results. The performance results reported above represent the results for the Superfund funds employing the longest track records for their respective strategy and are reported net of fees and expenses, with the exception of subscription and redemption fees (if any). These funds are closed to new investments. Although other Superfund funds employ the same strategy as these funds, there is no guarantee that the other funds will achieve the same results due to many factors, including but not limited to, different fee structures, different levels of assets under management, and the possibility of different entry and exit points. This material constitutes neither an offer to sell nor a solicitation to invest. Such an offer or solicitation will be made only in those jurisdictions where permitted by law and will be preceded or accompanied by a current prospectus and such other offering documents as may be required. Prospective investors should take appropriate investment advice and inform themselves as to the legal requirements, exchange control regulations and taxes in their countries of citizenship, residence or domicile. Subscriptions to Superfund funds are to be made on the terms of the relevant prospectus and/or offering documents and no reliance should be made on the information contained herein. Although the information in this communication is believed to be correct, no representation or warranty is given as to the accuracy of any of the information provided and no Superfund entity or their agents assumes any liability or responsibility for the information provided. All investment funds managed or distributed by members of the Superfund group of affiliated investment companies are speculative investments. Futures trading is leveraged and subject to sudden and large losses in value, therefore investors must be prepared to lose all or substantially all of their investment. Superfund funds may be subject to certain conflicts of interests. Please refer to the applicable prospectus or offering documents for further details of the risks, fees, and expenses involved in connection with an investment in any particular Superfund fund.
